

The presentation should include 3 slides:

1st Slide:

- Describe what your idea is in one or two sentences max.
- Add a visual of your idea with explanations. It can be a picture /a pencil sketch/ digital sketch. It's o.k if it's just an Initial structure/design we just want to get the idea. You may add a link to a video (Do not upload a video file).

2nd slide:

- What is the need/problem you are solving (Two sentences max) .
- In what ways is your idea different from alternatives that exist in Nigeria? (Two Sentences max).

3rd slide: You/Your team: Name, role, top skills

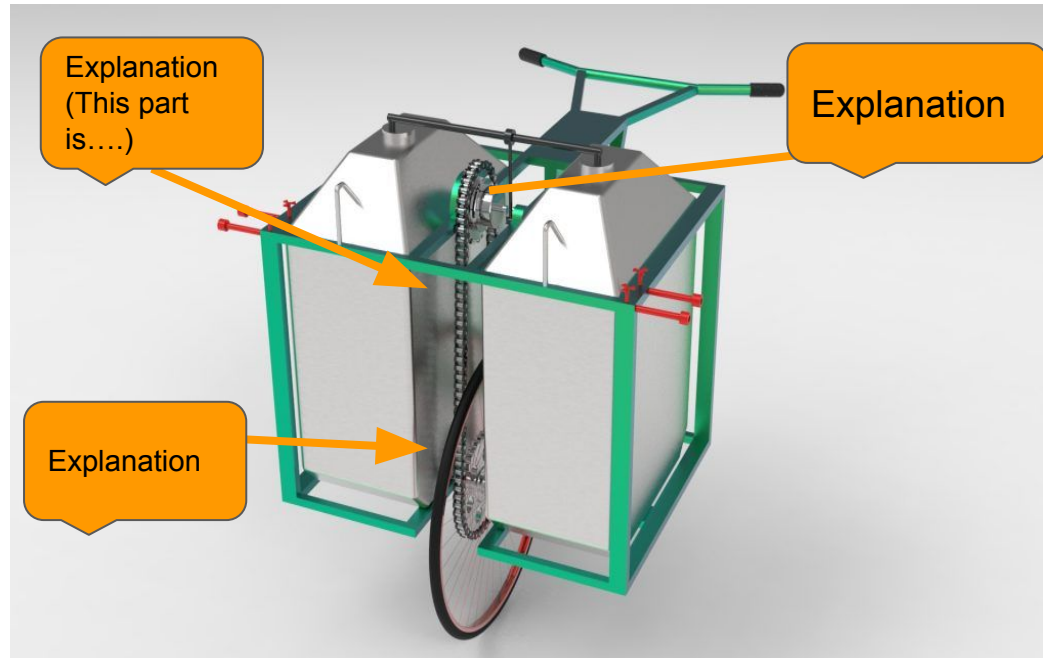

Please see the following examples :

-Example-

Your idea in one or two sentences

A Spraying device -used in the application of herbicides and pesticides on farms.

Spraying is achieved by wheeling the device which generates power from the wheels to activate the pump thereby converting oscillatory motion to reciprocating motion.

[Video- Link](#)

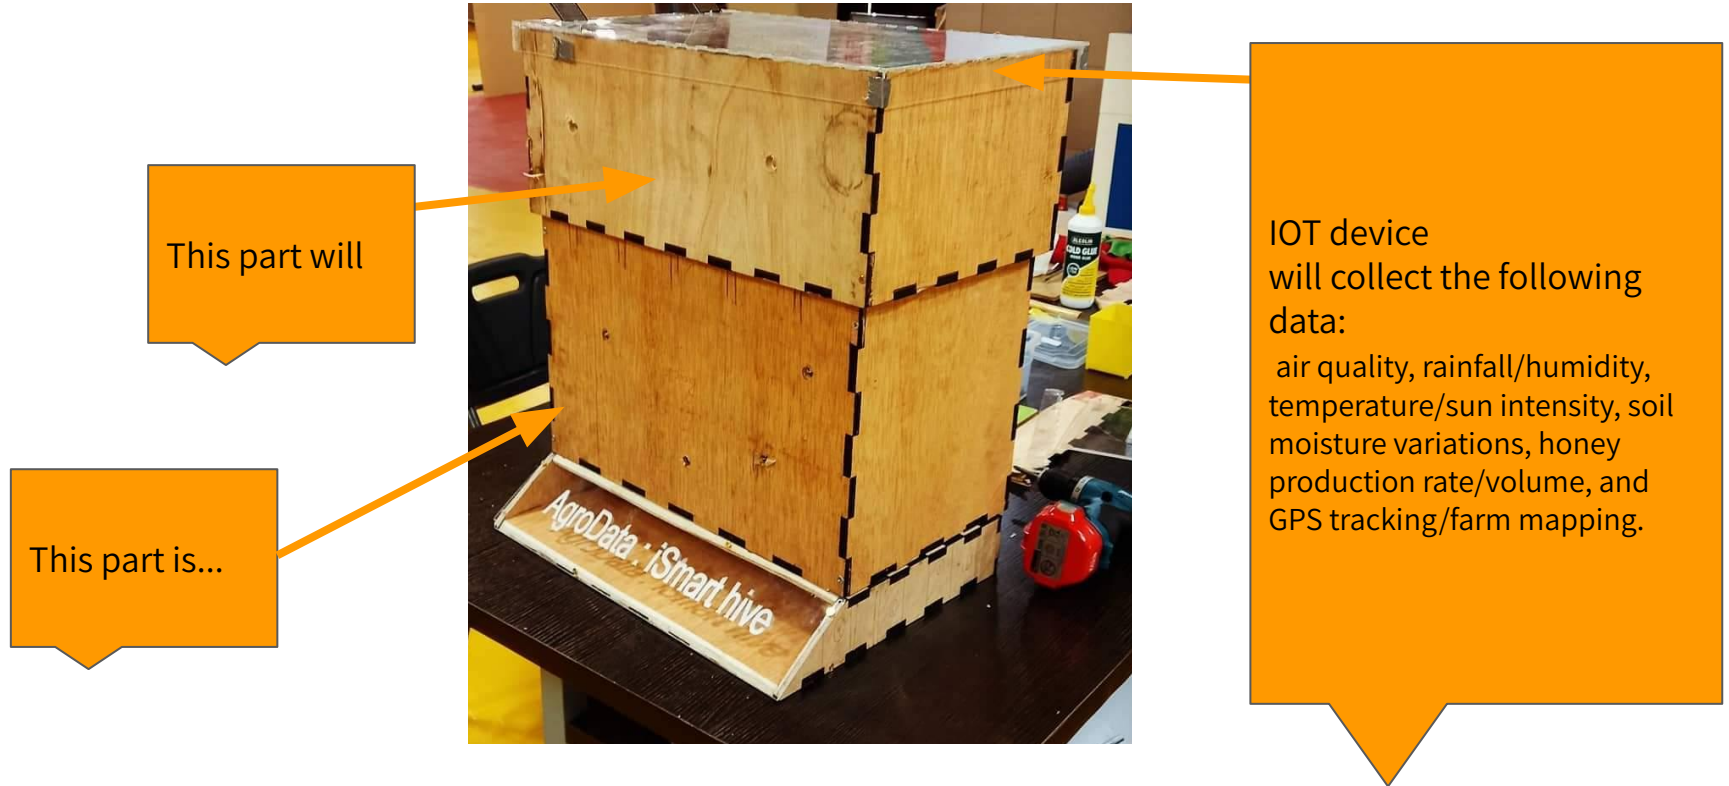

- Describe the need or problem you are solving (Two sentences)
- How is your idea different or better than alternative solutions currently exist in Nigeria? (Two Sentences)

You/Your team

- Name
- Role
- Top Skills

-More examples-

"iSmart hive is an IOT based bee hive, that helps to foster rapid bees colonization, towards active pollination of crops. It also collects data from the environment for better bees, soil and crop management"

-More examples-

The visual can also be just a pencil sketch
